AURENE: Steuben’s Iridescent Art Glass
January 10th – April 6th, 2014

SYMMETRY is when one shape becomes exactly like another when divided down the center by a line. The simplest type of Symmetry is "Reflection".

Here is an example of a symmetrical object in the Forsyth’s exhibition.

TRY IT OUT!
In the frame below, draw something that is symmetrical. If you’d like, sketch an object in the gallery that appeals to you.
**Asymmetry** is when one shape **does not** become exactly like another. Draw a line down the center. Look here...........

**List three (3) objects in the AURENE exhibition or at HOME which are asymmetrical:**

1.

2.

3.

**Draw one of the objects below!**
