No-Mess Monster Craft
Here is what you do to make your own little rainbow creatures:

1. Dab on globs of paint toward the middle of a piece of paper. (You will want to make sure that the dabs of paint are close together so that it looks like a body when they are squished together)

2. Fold in half.

3. Squish and rub (the best part!)

4. Open paper. Add googly eyes (you don’t need glue if you stick them on when the paint is still wet) This is also a fun part because it’s kind of like seeing shapes in the clouds. Everyone has a different thought about where the head should be, whether it has a tail, etc.

5. Use a black marker to add other details (horns, feet, whiskers, arms, etc).

Adding little snips of yarn for hair could also liven them up. We cut ours so that the girls could play with them like paper dolls!
